OUR SERVICES:

Commercial and Residential Heating, Air Conditioning & Plumbing

When you choose to work with Horizon Mechanical you will be confident in knowing you've selected a team of highly trained and skilled service professionals!

Our technicians are background checked and drug free. They are factory trained, NATE certified, and authorized to repair, service, and install all makes and models of heating and air conditioning equipment. They use the most modern tools and equipment to accurately diagnose and repair your heating, air conditioning and plumbing systems.

ACCREDITED
BUSINESS

Just as doctors diagnose and keep a comprehensive record of all patients, we maintain a complete database of all invoices, tests, and results of services provided. This record is an essential tool to help optimize the operation and identify any developing problems with your heating, air conditioning, or plumbing systems.

When you call Horizon Mechanical you will reach a live person 24 hours a day!

303-346-3466

**We are available day or night
to respond quickly if any
emergencies arise.**

Important Information

1) 80% Efficient Furnace Phase-Out for Northern Region –

Starting on May 1, 2013, new regional standards will require as a minimum, the installation of 90% High Efficiency Condensing Gas Furnaces, when replacing existing systems in “Northern States”, which includes Colorado. Standard efficiency 80% gas furnace models will no longer be available, or code compliant for our region.

You may be asking how would this impact me? If you are considering the replacement of your homes’ heating system in the near future, there are some potential issues worth considering. Such as equipment space constraints, exhaust venting requirements, and condensate disposal. High efficiency equipment changes the application of the equipment which can add a significant cost increase to a heating system renovation. To name a few: potential drywall repair, painting, losing interior living space, and in some cases equipment relocation.

Confused? Want to know how this change will impact you, your home and your finances? **Call today (303-346-3466)** so we can discuss your options while you have more options to choose from.

2) REBATES / SPECIAL FINANCING / HOME ENERGY AUDITS

How is a homeowner to know what rebates and special terms they qualify for and even more important, how do you GET the money?????

The world of rebates is not an easy area for homeowner’s to work through on their own. Not only are we fully up to date with the rebates and other offers available but we fill out the paperwork and mail it in for you! Now how many contractors will go to this extent for their customers? Not many. As a matter of fact, at the last meeting held by Xcel Energy and attended by local contractors, less than half of them had EVER assisted a homeowner in qualifying and receiving a rebate.

We assist 100% of our customers who qualify for a rebate, so you actually receive the rebate.

Rebates can be significant.

Rebates range from: \$90 - \$3425.

Let us help you get the system you want and maximize your total rebate on the purchase.

Rebates and Special Financing Terms – Offers are subject to qualification deadlines so call us today!

3) Trane Fall/Winter Promotions –

0% APR with payment in full in 36 months
OR

Up to \$1,250 Instant Rebate*

Fall Promo – Good ‘til Oct. 31st, 2012

Winter Promotion still to be determined – Call 303-346-3466

Make Your Life Easier

Maintenance is one of the most important things you can do to ensure your homes comfort system will continue operating effectively, provides peace of mind and helps to eliminate urgent, unexpected, inconvenient repairs. We have all been educated on the importance of maintenance on a vehicle, the benefits of maintaining its value and reliability along with ensuring the safety of all occupants. Would you run your car and not check the tires, brakes, oil, belts, or coolant? Of course not! The same should hold true for the heating and cooling systems in your home. Annual Maintenance ensures the safety of everyone in your home as well as protecting the value and longevity of your homes comfort systems.

We want to work with you by providing a mutually beneficial maintenance program.

First let's talk about what's in it for YOU!

- Preferred Rates on Repairs
- Eliminates Standard Trip Charges
- Doubles Service Parts & Labor Warranties
- Preferred Scheduling
- Standard Rates for Overtime Calls
- Reminders for Scheduled Maintenance
- Complimentary Whole House Plumbing Inspection
- During the Manufacturers Recommended Annual Maintenance we will also do a basic visual inspection of other equipment in the home such as the water heater, humidifier & electronic air cleaner for no additional charge.
- 25% of your accumulated annual unit premium up to 10 years may be applied towards the replacement of that unit when purchased from Horizon Mechanical. (Residential customers only.)

What's the cost?

The cost is based on the equipment in your home, but equals the same amount that you would pay annually for the regular maintenance visits. Your payment is broken into easy monthly payments. If you have questions or would like to get signed up, call us at 303-346-3466.

Price: Begins as low as \$16.50 per month

By the way, Horizon also offers commercial maintenance and repair services. Call us if you own a business and/or building that could benefit from our value added services.

Make Your Home More Energy-Efficient

Install green certified products, reduce your carbon footprint, State of the Art Comfort System, Signature Series, Rolls Royce Comfort Heating and Cooling System, Hybrid Eco-Friendly Green System.... Whew, the list goes on and on with fancy ways to talk about reducing your energy usage. Let's speak plainly here. Gas forced air furnaces heat your home with natural gas or propane. Heat pumps give you the option to heat with either fossil fuel or electricity, using whichever costs less while still providing maximum comfort. There are also utility incentives to help cover some of the costs of installation, which we will identify, complete paperwork, and mail for you so you do not miss out. A properly sized, highly efficient heating and air conditioning system; lowers your energy costs and your homes impact on the environment.

Dual Fuel System Trane XC95/XL20iHP

Capable of heating your home by electricity or fossil fuel for ultimate efficiency.

Will reverse its winter operation to cool your home in the summer.

Installed Price Range: \$18,722 - \$13,460

Per Month: \$1,560 - \$1,122

Ductless Mini-Split Heat Pump Mitsubishi High Wall Unit

Per room comfort without compromise.

Indoor unit more quiet than a human whisper.

Makes your home an oasis of comfort:

Cool in the Summer - Warm in the Winter

Installed Price Range: \$12,000 - \$8,750

12 Months No Interest Financing WAC

Per Month: \$1,000 - \$829

Make Your Home Warm and Cozy

Obviously your home has a heating system. It could be heated with a gas forced air furnace, heat pump, or by a boiler. Traditionally with a gas forced air system most of us resign ourselves to the fact that the temperature is not going to be delivered evenly. There are warm rooms and cool rooms; some are comfortable while others are not. Many of the furnaces are noisy and no one celebrates the cost associated with heating our home.

You don't have to live with these drawbacks anymore! Today's heating systems offer many options to create a warm, comfortable, quiet home and at a relatively low cost of operation. Both Furnaces and Boilers are available in standard and high-efficiency models with many different bells and whistles. To determine what your home needs requires us to perform an on-site assessment where we will perform calculations to determine what size unit is needed. This process will help guide you to the best heating options available for your budget. Because the system will be in your home for such a long time, it is very important that we provide you with all the information regarding how the system will feel, sound, operate, and cost you to own during its lifespan.

Trane XC95 – Converts 95% of the fuel into warm, cozy heat
Slows airspeed for quieter operation. Adapts to your home, provides truly optimized comfort and efficiency
Installed Price Range: \$6,800 - \$6,000
12 Months No Interest Financing WAC
Per Month: \$600 - \$500

Trane XV95 - Converts 95% of the fuel into warm, cozy heat
Slows airspeed for quieter operation
Installed Price Range: \$6,500 - \$5,600
12 Months No Interest Financing WAC
Per Month: \$550 - \$468

Trane XR95 – Converts 95% of the fuel into warm, cozy heat
Installed Price Range: \$6,100 - \$5,400
12 Months No Interest Financing WAC
Per Month: \$509 - \$450

Per Month: \$583 - \$304

Trane XR80

– Standard Heating System

Installed Price Range: \$4,500 - \$3,800

12 Months No Interest Financing WAC

Per Month: \$375 - \$316

Hot Water Heating or Boilers are a Specialty of Horizon Mechanical

Hand crafted mechanical systems, custom designed to maximize the comfort and efficiency delivered to your home. This specialty service highlights our dedication to detail and precision that can only be found with the team of Boiler Specialists at Horizon. We can design systems from the most basic to the most elaborate, with serviceability, system efficiency, and your comfort in mind. Don't forget, we are always available to service these types of heating systems as well.

Installed Price Range: \$18,000 - \$9,700

Make Your Home Cool and Comfortable

All homes in Colorado come with a heating system, however not all of them have central air conditioning. Whether you are adding air conditioning for the first time or replacing your current system, we can help. Do you have seasonal allergies? If so, running your air conditioner, instead of opening windows at night, during the allergy season will help prevent allergens from coming into your home. Air Conditioning allows you to secure your home by closing the windows, and you won't have outdoor noises infiltrating your home.

Did you know that when it comes to air conditioning, bigger is not better? It is even worse than selecting a piece of equipment that is too small. For maximizing your comfort, the reliability of the equipment and ensuring the lowest possible operational cost, we do a complete heat gain calculation, a ductwork calculation and an equipment verification to ensure that the size we install is correct. The work does not stop there because until the equipment is installed, and adjusted to some very specific requirements, you will not get the efficiency that you are paying for. Improper air flow and inadequate refrigerant charge can effect the reliability and durability of the equipment as well as the lifetime utility costs so we take the time to properly start-up your equipment. Does Horizon go beyond our competition, with our installation processes and procedures? **Absolutely!** Allow us to show you how we're different. **Call us for a free on-site proposal** and detailed explanation of your options. **303-346-3466**

Trane XL20i - High Efficiency

This system actively learns how to best deliver maximum comfort and efficiency to your home.

Smallest Carbon Footprint

Installed Price Range: \$10,021 - \$7,400

12 Months No Interest Financing WAC

Per Month: \$835 - \$617

Trane XL16i – High Efficiency

Designed to help eliminate temperature swings in your home, between equipment cycles. Operates at two different speeds to provide just the right amount of cooling.

Saves energy while optimizing comfort
Installed Price Range: \$8,793 - \$5,996
12 Months No Interest Financing WAC

For that impossible to cool area of your home. Indoor System – Operates at a quieter than a human whisper level.

Installed Price Range: \$11,500 - \$8,200
12 Months No Interest Financing WAC
Per Month: \$958 - \$683

Make Your Indoor Air Healthy and Clean

What impacts the air quality in your home? Outdoor air pollution comes in through small cracks and seams. Furniture, paint, carpet, and cleaning products all emit chemicals into our air that can be hazardous to our family's health. Children and the elderly are more susceptible to these chemicals. Reported cases of Asthma and certain Allergies have been on a dramatic rise for the past 10+ years. As our homes are made more energy efficient, they trap chemicals and pollutants, exposing us to excessive amounts of particulates. Respected organizations such as National Jewish Hospital in Denver study the effects of the air inside our homes and how it can affect our health. According to the EPA we spend on average 90% of our time indoors, and studies show that by improving the air quality in our homes our immune systems are able to rejuvenate and restore themselves. By providing a healthier indoor environment, you and your family will feel better for it.

Call us for a complimentary on-site visit, and an indoor air quality expert can help to design the best system for you and your family. **303-346-3466**

Steam Humidification

Whole-House humidification for Sinus and Skin Health with Woodwork Protection. By adding the right amount of humidity you can reduce your heating costs. Humidified air feels warmer, even at a lower temperature. Steam units are needed for the larger, more voluminous home and/or when a very specific level of humidity is required. Safe to use – does not grow molds or bacteria.

Installed Price Range: \$2,778 - \$1,800

12 Months No Interest Financing WAC

Per Month: \$232 - \$150

Standard Humidification

Whole-House humidification system for the average home. Eliminate static shocks and help to reduce heating costs, as Humidified air feels warmer, even at a lower temperature. Easy maintenance. Safe to use – does not grow molds or bacteria.

Installed Price Range: \$1,409 - \$750

12 Months No Interest Financing WAC

Per Month: \$117 - \$63

High Efficiency, Dust Arresting Air Cleansing System

Removes 99.98% of Airborne Allergens
No replacement filters to buy
Whole house air cleansing system
Installed Price Range: \$2,298 - \$1,797
12 Months No Interest Financing WAC
Per Month: \$192 - \$150

Easy Breathe Air Quality System

Very effective air cleaner, installed in its own housing, with a sealed door to ensure that you are getting the efficiency from the filter you are paying for. Easy maintenance, simply replace high capacity media filter just once or twice a year, sometimes more often depending on environment and usage.

Installed Price Range: \$900 - \$761
12 Months No Interest Financing WAC
Per Month: \$75 - \$64

Centralized Whole House HEPA Vacuum System

Helpful in eliminating dust and allergens at the source, with a vacuum system located outside of the living space. Make cleaning easier, no need to drag a vacuum up and down stairs. Actually removes the dust and dirt from your home and deposits in a canister in your garage or basement.

Installed Price Range: \$8,000 - \$5,000
12 Months No Interest Financing WAC
Per Month: \$667 - \$417

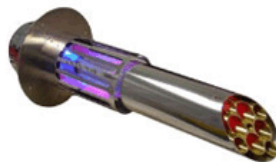

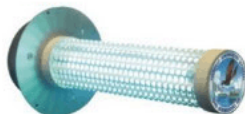

HEPA Vacuum System Accessories – Sold Separately

Whole House Air Purification

“Surgical Room” air quality system utilizing mold, virus and bacteria eliminating illumination. The latest in highly effective air purification systems.

Installed Price Range: \$1,092 - \$902
12 Months No Interest Financing WAC
Per Month: \$91 - \$75

Make Your Home Safe

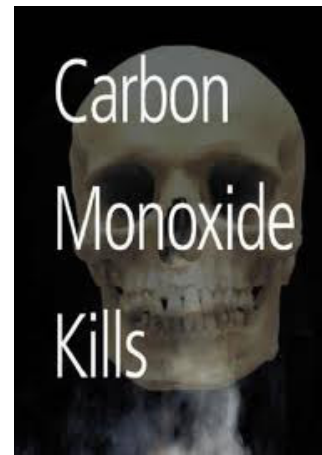

Our homes are supposed to be a safe haven from the rest of the world. According to the EPA we spend as much as 90% of our time indoors, so it should be very important that we make our homes as safe as possible for our family. Protecting young ones from excessively hot water, preventing water damage from a burst pipe or failed water heater and avoiding illness or death from carbon monoxide poisoning, are just a few of the things that are to be considered. We also want to do our best to protect appliances and electronic entertainment devices from power failures and spikes.

Low Level Carbon Monoxide Monitor

Helps you to manage your indoor environment and alerts you to instances where you or family members may be exposed to potentially harmful, low levels of Carbon Monoxide, that a standard detector will not alert you to.

Price: \$235.94

Anti-Scald Three Way Mixing Valve

Protect your homes domestic water from the possibility of growing bacteria that is responsible for Legionnaires disease (The National Research Council has recommended that the water temperature in water heaters be set at 140°F to prevent the proliferation of Legionella bacteria). Increases the amount of Hot Water produced from your existing water heater, and protects family members from being scalded by hotter than expected water from the tap.

Price: \$791.16

Need Service ? – Call Now!
www.HorizonMechanical.com

SUPCO Surge Protector

You currently protect your computer systems and TV from electrical surges, well your high efficient heating and cooling systems also contain expensive circuit boards that are susceptible to these same hazards. Protect them with a surge protector too, and as a bonus this surge protection system comes with a \$1,000 equipment protection guarantee.

Price \$386.94

Automated Whole House Water Shutoff Device with Wireless Sensors

Protect your home from damage caused by a burst water pipe, utilizing an automatic shut-off valve on your incoming water line and remotely located wireless sensing devices, so you can protect your whole home, even if you are away.

Installed Price Range: \$1,800 - \$892

12 Months No Interest Financing WAC

Per Month: \$133 - \$74

Water Alarm

Inexpensive and unobtrusive little devices designed to alert you audibly, to even the smallest of water leaks or drips, that you may not notice right away, potentially before a major incident were to occur.

Price: \$61.14

Locking Refrigerant Caps Anti-Huffing/Anti-Tamper Caps

Now required by code for new cooling equipment installations, these devices prevent the possibility of tampering with system refrigerant. Protects you from liability in case an individual decides to purposefully inhale the chemical refrigerant "known as huffing".

Price: \$69.99

Make Your Home Easy to Monitor

Have you ever noticed that you walk into one room and you are just the right temperature, then you go into another room and you are chilly, and into a third room and you are roasting? Isn't there a better way to handle the differing temperatures? Or, how about when you are engrossed in a project and you just know you should break away and go check on your kids or pets playing in another area of the house? You have options!

There are many options on the market today and new ones on the horizon. We stay on top of the new technologies that increase comfort, monitoring, and energy efficiency. We would be happy to meet with you to discuss the products shown here as well as any new products or services that may have become available since this printing. Let's set an appointment to meet at your home to get a better understanding of what your needs and wants are so we can match you up with the correct products. Call us to set an appointment that fits your schedule: 303-346-3466

Price Range: \$15,000 - \$6,000

Make Your Home's Plumbing System Clean & Dependable

When it comes to plumbing many people have lots of concerns but don't know who to ask, or we find they are dealing with daily frustrations that could be prevented in the first place. Horizon has solutions to a lot of these things, such as the following:

- A small water leak under the sink or at the outside hose connection, a slow drain, a recurring noise from the water heater, or a tricky garbage disposal that is not bad enough to worry about just yet.
- Hard water mineral stains on faucets or glass shower doors that are becoming harder and harder to remove.
- Your growing family may have you concerned about future hot water needs, or conflict is already occurring about hot water usage.

Let Horizon alleviate some of those concerns, we offer a Complimentary Whole House Plumbing Inspection with any service, so if you have a question please let us know, maybe it is something we can just handle for you right on the spot while we are there.

Below is a partial list of plumbing products and services Horizon provides, that you and your family could benefit from. Call us now so we can assist you. 303-346-3466

Per Month: \$57 - \$50

Garbage Disposal

Perhaps the most underappreciated kitchen appliance.

Installed Price Range:
\$1,500 - \$627.36
12 Months No Interest
Financing WAC
Per Month: \$125 - \$53

Bio Clean – Biodegradable Drain Cleaner

The environmentally friendly way to maintain your homes drains to help eliminate backups and slow drains from occurring in the first place.

Price: \$ 52

Make Your Air Ducts Cleaner

WHY SHOULD I CLEAN MY AIR DUCTS?

• Health threatening organisms including bacteria, mold, fungi and mildew can live and breed in your air duct system. Indoor air pollution is ranked in the top five health risks by the EPA. One major source of indoor air pollution is dirty air ducts.

• Imagine having a room in your home that you never enter so it is never vacuumed or dusted. Well, your air ducts are just that and every time you turn on your heating or cooling system, that dust is stirred up and blown into the rest of your home.

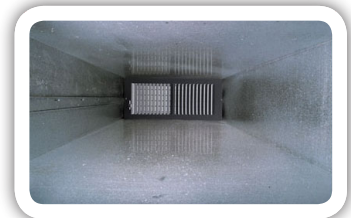

• Many people suffer from allergies. Reducing the particulate debris helps to reduce dust particles and potential allergens in the air. These allergens include dust mite waste which many people are allergic to. Reducing debris in your ducts helps to reduce their food source.

HOW OFTEN SHOULD I CLEAN MY AIR DUCTS?

• Angie's List: <http://www.angieslist.com/articles/air-duct-cleaning-worth-it.htm>

NADCA (National Air Duct Cleaners Association) expert Buck Sheppard argues the need for cleaning depends on a variety of factors, including pets, smoking, recent renovations, local weather conditions and overall home cleanliness. Sheppard recommends cleaning them every three to five years.

Ultimately, the decision to clean air ducts comes down to a homeowner's own judgment. "Get a screwdriver, open up the register and look in there yourself," Schulte says. "Most can make up their mind at that point." (Angie's List)

BEWARE OF THE SCAMS

• Dateline "Low Priced" Air Duct Cleaning Scam Part 1

<http://www.youtube.com/watch?v=RDxhXZZT9Bg>

A special report conducted undercover to reveal the ways consumers get taken advantage of by unscrupulous companies who use false and misleading claims to overcharge for air duct cleaning.

• Dateline "Low Priced" Air Duct Cleaning Scam Part 2

<http://www.youtube.com/watch?feature=endscreen&v=KpNa5-Yd5Bc&NR=1>

Some companies want you to think they'll do a proper air duct cleaning on your home for low prices like \$49-\$99. Here's the second part of a recent report on an undercover investigation on "low price" air duct cleaning scams that Dateline NBC did with NADCA (the National Air Duct Cleaning Association). "If it's too good to be true, it probably is."

WHAT WILL HORIZON DO?

- Comprehensive site survey with you, the homeowner.
- Pull and clean all grills.
- Visual inspection of the furnace blower motor and wheel.
- Electrical & Mechanical inspection of the furnace motor and capacitor.
- Operational check out of the furnace.
- Visual inspection of air conditioning coil. (If Applicable)
- Visual inspection of furnace and water heater flue.
- Inspect for combustion air.
- Clean all air ducts.
- Clean the supply air main trunk.
- Clean the return air main trunk.
- Clean the return air drop.
- Clean the furnace blower compartment.
- Clean the furnace burner compartment.
- Final operational check out of furnace after all cleaning.

- **Price for Duct Cleaning:** Begins at \$440.00
- As always, Peak Advntage Service Agreement members get a discount!

Make Your Dryer Vents Cleaner and More Safe

WHAT ABOUT MY DRYER VENT?

• A dirty dryer vent can cause your dryer to work less efficiently. Having the vent cleaned may help shorten the run time and reduce the wear and tear on your dryer, which can help lengthen the life of your dryer and reduce the need for repairs.

• A dirty dryer vent can also be harmful. According to the National Fire Protection Association, there are almost 16,000 clothes dryer fires a year causing an estimated \$99 million in losses.

• NBC Today show Dryer Fire Prevention

http://www.youtube.com/watch?v=ZYsU_vBw6oY

According to Today Show: Do not use a plastic dryer vent flex connector, and have vent cleaned once a year

FLEX CONNECTOR?

• What is a flex connector? It is the flexible dryer vent connector that connects your dryer to the vent tubing. Check yours out! Is it plastic or metal? Don't be fooled by the metallic shiny plastic. Many homes are equipped with a plastic flex connector, but it is highly recommended that you replace these with metal flex connectors.

• **Great Lakes Home Performance** **Bad Idea**

Plastic flexible dryer vent connector

<http://www.youtube.com/watch?feature=endscreen&v=vfExQ3mwBH8&NR=1>

Good Idea

Ridged metal dryer vent connector

<http://www.youtube.com/watch?v=oBqbGGc1FMw&feature=relmfu>

- **Price for Duct Cleaning:** Begins at \$440.00
- **Price of Dryer Vent Cleaning Alone:** \$312.00
- **Price of Dryer Vent with Duct Cleaning:** \$214.00
- As always, Peak Advantage Service Agreement members get a discount!

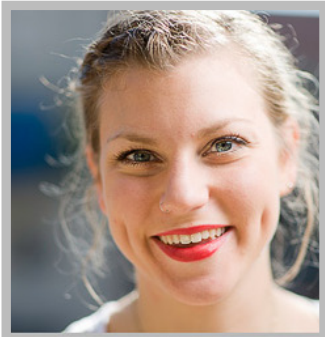

WHAT WILL HORIZON DO?

- Cycle the dryer. This will allow us to:
 - Verify unit is operating.
 - Check for air flow and possible blockage(s).
- Pull dryer out from wall.
- Connect a vacuum with a HEPA filter to the interior vent.
- Go outside and use an auger brush to clear out the entire vent with the vacuum running.
- Back inside, we will then vacuum out the area around and behind the dryer. While back there we may also rescue a few stray socks.
- Inspect the dryer vent connector. (The tubing that connects your dryer to the vent.)
- Reconnect everything and put the dryer back in place.
- Remove the lint screen and wash, in your sink, with hot soapy water.
- Use a lint brush to clean out the lint trap area inside the dryer while the lint screen is removed.
- Cycle the dryer one more time to make sure it is operating.

- **Price of Dryer Vent Cleaning Alone: \$312.00**
- **Price of Dryer Vent with Duct Cleaning: \$214.00**
- As always, Peak Advantage Service Agreement members get a discount!

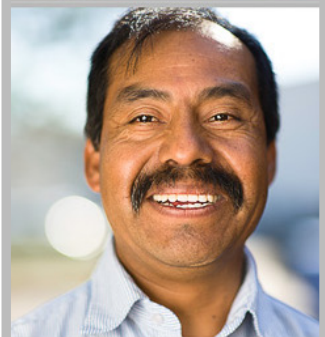

Testimonials

"I have worked with Horizon Mechanical to troubleshoot HVAC issues both at work and at home. Their staff is of the highest caliber, and complete customer satisfaction is their primary goal. Horizon really goes beyond the norm in providing the best possible service. I would recommend Horizon's services to anyone interested in the best repairs and the best service at a very fair price."

Julie P. -Highlands Ranch

"We had family and guests flying in from all over the states and our A/C went out on Friday with the air temperature at 91! I called around and no one could arrive that day and the additional weekend charges were going to put a damper on the weekend celebration. Horizon was able to be at my home at 7AM on Saturday morning and had my AC working by 8AM, well before the heat arrived. The technician was professional, knowledgeable and friendly! I signed up for a yearly maintenance plan for the A/C and the Furnace. Our house was nice and cool for the holiday thanks to Horizon!"

Bill M. -Greenwood Village

"Great Experience. We'll do business with Horizon again, they take care of our concerns, show up on time, go above and beyond, do the work they say they are going to do, and are professional at all times."

Hans H. -Centennial

"Went above and beyond to make sure I was completely satisfied with their work. My AC works great and I will use Horizon Mechanical for all my AC/Heating and Plumbing needs. They were fantastic!"

Dawn K. -Centennial
